

# INCOS ENGINEERING EXPERTISE AT A DISTANCE

## SME'S WORKING REMOTELY WITH YOUR SITE BASED TEAMS

## Why choose Expertise At A Distance?

Accessing Expertise At A Distance (EAAD) regardless of device (HoloLens, Mobile, Tablet or computer) can be set up relatively easily and managed by INCOS Engineering and its partners in Perth.

Empowering front line workers to resolve challenges is key to their job satisfaction and can also reduce overall operational costs.

Extending the life of your asset and ensuring equipment is maintained and working within the industry defined guidelines remains critical even though we are all experiencing pressure to reduce site footprint.

### OPERATIONAL SUPPORT

Whether it's carrying out site inspections, testing, repairs or maintenance your Subject Matter Experts can work alongside your site based staff – but from afar.

- Fire safety engineering
- Technical support
- Training services
- Assurance/Monitoring

EAAD – Addressing site based needs efficiently and effectively.
